PROFESSIONAL SUMMARY

Product design leader who builds systems, people, and processes at scale, grounded in a deep, hands-on understanding of customer behavior. 10+ years of end-to-end design experience and 4+ years managing multidisciplinary teams across complex, regulated B2C financial products, unifying design standards across 4 autonomous business lines and scaling agile practice studio-wide. Runs customer-discovery research as a standing practice across the product portfolio - from digital loans to mortgages to credit cards - and has delivered measurable results including 18% growth in loan conversions and an 80% shift to digital self-service. AI-native since 2025, building daily with Claude Code and Figma AI. Works directly with C-level executives to turn complex business logic into calm, trustworthy user experiences.

CORE COMPETENCIES

Hands-On Product Design (Expert Figma) • Design Systems Architecture • Mobile-First B2C • AI-Native Design & Prototyping • Trust & Regulatory Compliance • Cross-Functional Leadership • Product Discovery

PROFESSIONAL EXPERIENCE

Product Design Manager (Strategic & Hands-On) | Bank Hapoalim

May 2022 – April 2026

- Unified design standards across 4 autonomous business lines (tribes) through scalable Figma libraries, components, and handoff workflows.
- Coached a team of 7 designers across 4 autonomous tribes, with 8+ squads running within them, raising the bar on craft and business-driven problem solving.
- Drove 18% cumulative growth in loan conversions by redesigning the core loan funnel, replacing 15+ backend templates with an intent-based flow (amount and purpose first) with ~180,000 monthly users entering the funnel.
- Directed the design of a new digital loan and account-opening flow for customers of any bank, from purpose and eligibility matching through fee-free account creation and repayment setup.
- Pushed back on a leadership request to raise credit-card conversion rates, declining to commit to a target until the underlying product-differentiation gap was addressed.
- Cut average call handling time by 8 minutes by designing a need-based guided dashboard for the internal mortgage system, now used by 150+ bankers.
- Ran the studio's cross-functional Agile Guild (designers, agile coaches, product managers), building custom Scrum practices per team and improving delivery cadence studio-wide.
- Mentored a senior designer who was later promoted into a peer management role; partnered directly with the bank's CEO and a VP-level executive during live product demos.
- Integrated Claude Code and Figma AI into daily workflows to speed up discovery and prototyping.

Senior User Experience Designer | Bank Hapoalim

Feb 2020 – May 2022

- Moved 80% of applications to digital self-service by redesigning complex B2C and B2B mobile and web workflows end to end.
- Translated heavy regulatory and compliance requirements into calm, transparent interfaces that customers could trust.
- Ran usability labs with face-to-face interviews and rapid Figma prototyping to validate design decisions against real user behavior.
- Proactively initiated customer-journey research across mortgage, loan, and credit-card projects when discovery gaps threatened solution quality, including embedding with car-dealership sales teams to map the full purchase journey firsthand.

User Experience Designer / Digital Projects Officer | Cal (Israel Credit Cards)

Sep 2015 – Feb 2020

- Designed the information architecture and end-to-end UX/UI for Cal's flagship mobile app, used by close to 2M active customers.
- Managed end-to-end digital projects and external vendor companies, some of which contributed to product characterization and spec work.
- Designed core digital financial products, including the loan request process and a foreign-currency charge deferral feature, across mobile and web.
- Worked with SEO and Google Analytics providers to define and read behavior reports, using drop-off data to improve conversion on landing pages and campaigns.

EARLIER EXPERIENCE

Technical Support, Help Desk | Cal (Israel Credit Cards) *2012 – 2015*

- Provided technical support, troubleshooting computer hardware, IT equipment, and software for end users.

Technical Support & QA | Aviv Pos Ltd. *2010 – 2012*

Shift Manager, Networking Operations | Unit 8200 (Israeli Intelligence Corps) *2005 – 2008*

VOLUNTEER & THOUGHT LEADERSHIP

Volunteer Product Design Mentor | Google & Reichman University

2025

- Guided UX students to launch-ready portfolios. One graduate joined Bank Hapoalim, and their concept now lives in the production credit card workflow.

Guest Lecturer | The Academic College of Tel Aviv-Yaffo

- Delivered guest lecture on “Psychology & UX,” sharing his path from junior designer to design manager.

EDUCATION & CERTIFICATIONS

Bachelor of Education (B.Ed.) | Seminar HaKibbutzim

UXV Certification (Advanced UX & Psychology, 6 Months) | John Bryce

UX Writing & Microcopy Certification | Nemala
